

**MEMES BRAINROT**  
**CRYPTO/WEB3/SOLANA**

[www.memesbrainrot.com](http://www.memesbrainrot.com)

## DeFi meets memes

**Memes move faster than money.**

But in crypto? Memes get lost in ~~rug pulls, seams, and broken promises.~~

**We're tired of watching the best parts of Web3 get drowned out by greed.**

**Memes Brainrot (MBR)** is *building* something different:

A trusted, evolving meme-ecosystem that rewards community, allows to interact with a dApp, and unites fun with crypto.

Our Vision	Our Mission	Our Values
Immortalizing and making memes interactive	To set a new standard for memecoins in DeFi	Loads of memes and brainrot

## Why Memes Brainrot?

AI is improving at an exponential rate.

Most work will become secondary to the human experience.

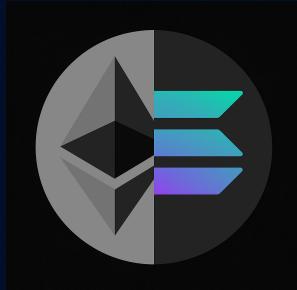

**Entertainment and freedom will rule.**

## Think about history

The next 25 years will bring exponential change.

One thing will stay stable, memes.

They will never cease to exist.

**14<sup>th</sup> century:** The printing press democratized knowledge.

**18<sup>th</sup> century:** Newspapers amplified mass communication.

**Late 19<sup>th</sup> century:** Comics visualized humor.

**Late 20<sup>th</sup> century:** The internet globalized connectivity.

**Early 21<sup>st</sup> century:** Memes revolutionized viral sharing.

**2009:** Bitcoin decentralized currency.

**2015:** Ethereum made blockchain contracts popular.

**2020:** Solana accelerated blockchain throughput.

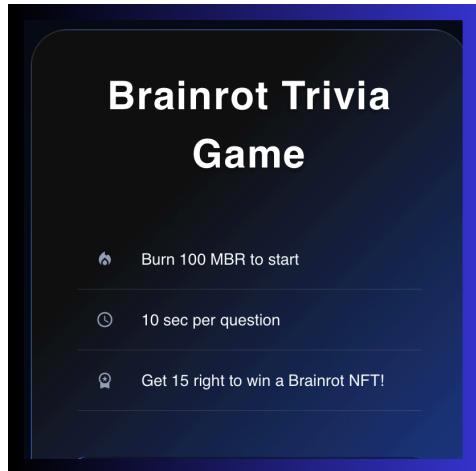

**Now 2025 and beyond:** MBR is making memes interactive in Web3, and building utility beyond being a “memecoin”.

# How do we plan to do it?

# Building Interactive Meme Culture

We want Memes Brainrot (MBR) to make memes truly interactive – not just collectibles, or simply trivias but a full experience. Entertainment, social, and gamified.

## 1- MVP Trivia Game

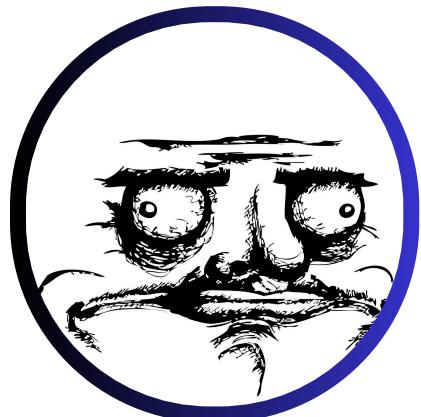

BURNING MECHANISM

## 2-Brainrot NFT's

LIMITED DROPS

## 3-Trivias of older memes

FUTURE EXPANSION

## We are executing our vision in three short-term phases:

### 1. Brainrot Trivia & wiki

By participating in MBR trivia challenges, players help the token become more scarce by burning tokens to play the trivia. Currently the trivia is live and playable. We have an initial 65 characters that were taken from the Fandom “AI brainrot characters”. We can expand based on community feedback to new trivias or guides on “meme-culture”

### 2. OG Brainrot Character NFTs

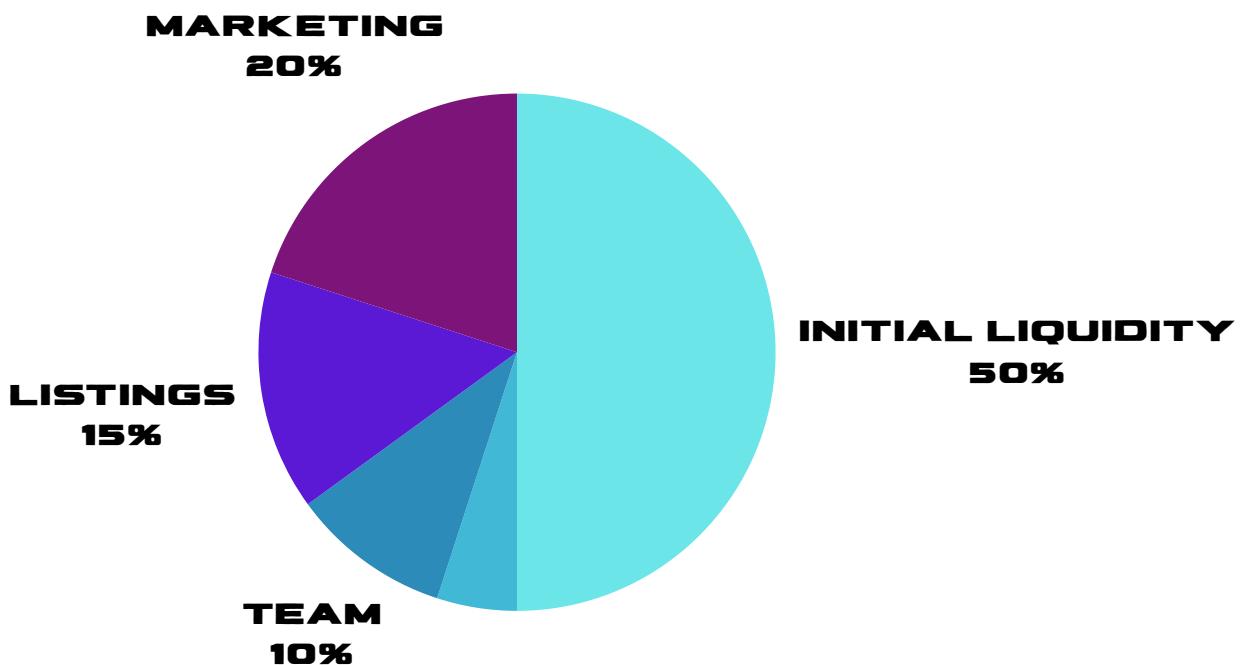

Our community will have access to limited edition NFT collectibles featuring the most popular iconic Brainrot characters. These NFTs serve as proofs of early participation and belief in the project. The project will expand to find novel uses of NFT's besides simple collectibles. As technology improves we hope to add far more integrations with time.

### 3. Ever-Evolving Trivia Worlds (Community-Curated)

The trivia will grow beyond the initial memes, expanding into new meme eras and trends, selected directly by the community. MBR stays as fresh as the internet itself. We hope in the future to slowly build a meme world where you can be and play mini-games as your favorite memes.

## Tokenomics

## Liquidity

Compared to 99% of memes we have a **huge** advantage

We encapsulate **the universe of memes** and make it interactive.
